

FEBRUARY 10, 2026

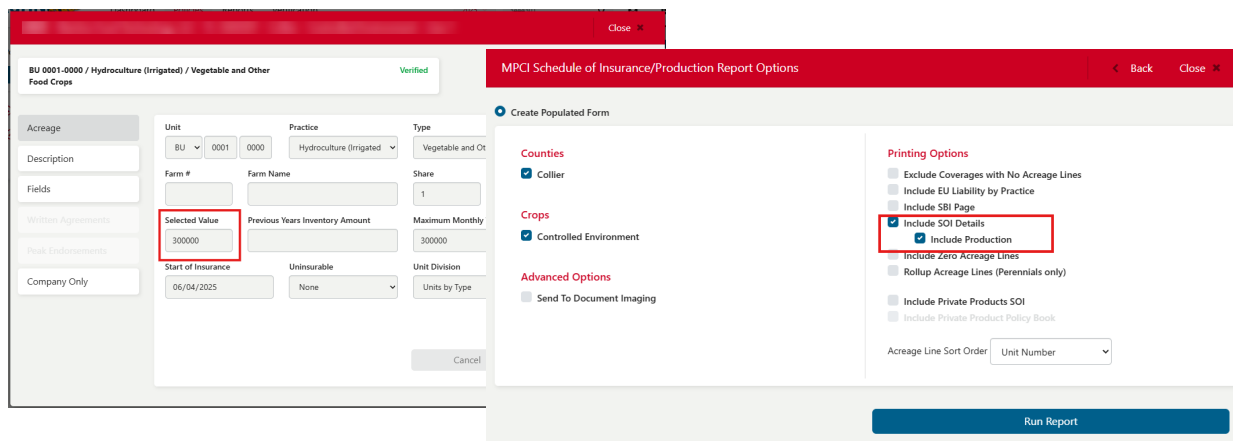

Beginning with this AgriNet Update, you will notice a series of system improvements that aim to enhance agent workflow and reduce underwriting workload. Look for these changes throughout the AgriNet Update.

The MPCl Policy Data Report and Policy Register have now been updated to show **CLIP** policies.

[illegible]

SOI/PR Form

The MPCII Schedule of Insurance/Production Report will correctly display acreage lines for Controlled Environment commodities. When “Include SOI Details” is selected, acreage lines with a Selected Value greater than zero will print automatically. Lines with a zero or blank Selected Value will only print when “Include Zero Acreage Lines” is selected.

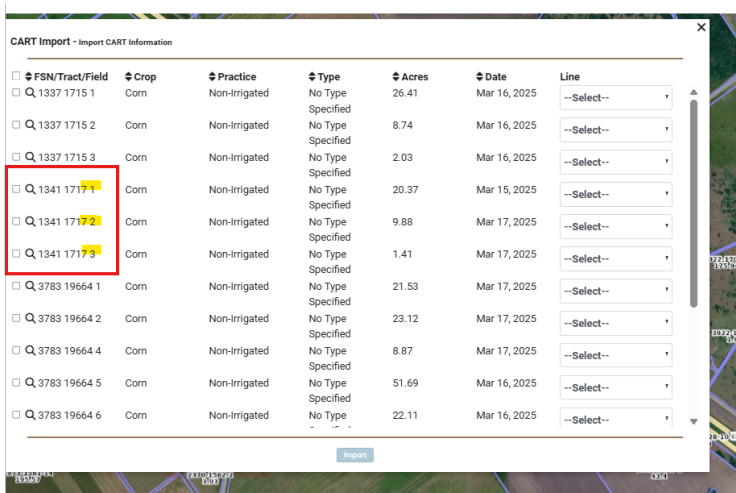

The report will also total **Selected Values** by practice/type and show those totals in the **Insured Acres** field on the coverage summary page and acreage detail lines. Because **Controlled Environment** commodities do not have a price per the ADM, the Price field on both the coverage summary and acreage detail pages will display a dash (–).

Coverage Information											
County	Crop Type/Practice Intended Use	Plan of Insurance Coverage Level/Percentage of Price Election	Options, Endorsements	% Unit Option Elected	Insured Acres	Uninsurable Acres	Percent Plant Acres	Price	Liability	Guarantee or Amount of Coverage	Premium Information
Collier	Controlled Environment VGOFC (851) HYCLT IRR (205)	DO 85%/100%			\$300,000	0.00	0.00	–	\$255,000	\$255,000.00 DOL	Base Premium \$2,729 Admin Fee \$30 Premium Subsidy \$1,774 Insured's Premium \$955
Totals					\$300,000	0.00	0.00	–	\$255,000	\$255,000.00 DOL	\$2,729 \$30 \$1,774 \$955
Amount of Administrative Fee Due the Approved Insurance Provider: \$30 Amount of Subsidy Paid by RMA: \$598											
A & O Note: This amount may increase by 1.15 percent of net book premium (except for area plans of insurance) if the loss ratio in the State exceeds 1.20 or may otherwise change if required by the Standard Reinsurance Agreement. However, the amount of premium you are required to pay will not change.

Mapping

CART events will now sort numerically by ascending order based on Farm, Tract, and Field Values. Previously the field value was not factored into the sort and only the Farm and Tract values were used.

Mapping Cont..

Skip Row fields are now hidden for all **Irrigated** planting practices in **Field Editor**. They will only appear when entering Non-Irrigated Cotton planting events. This applies to precision planting events as well.

RLU Shape Import is now part of AgriNet Mapping! Import shapes as RLUs where CLUs do not exist.

Shape Review - selected shapes are added to Policy Map

☒ Import Geometry (adds shapes from file to policy map)

☐ Add CLUs (adds CLUs to policy map based on location of shape in file)

Shape #	Suffix	Acres
Shape 1 (Does not overlap any CLUs)		16.75

Imported shape does not overlap any CLU's in the CLU layer. It will be saved as an RLU.

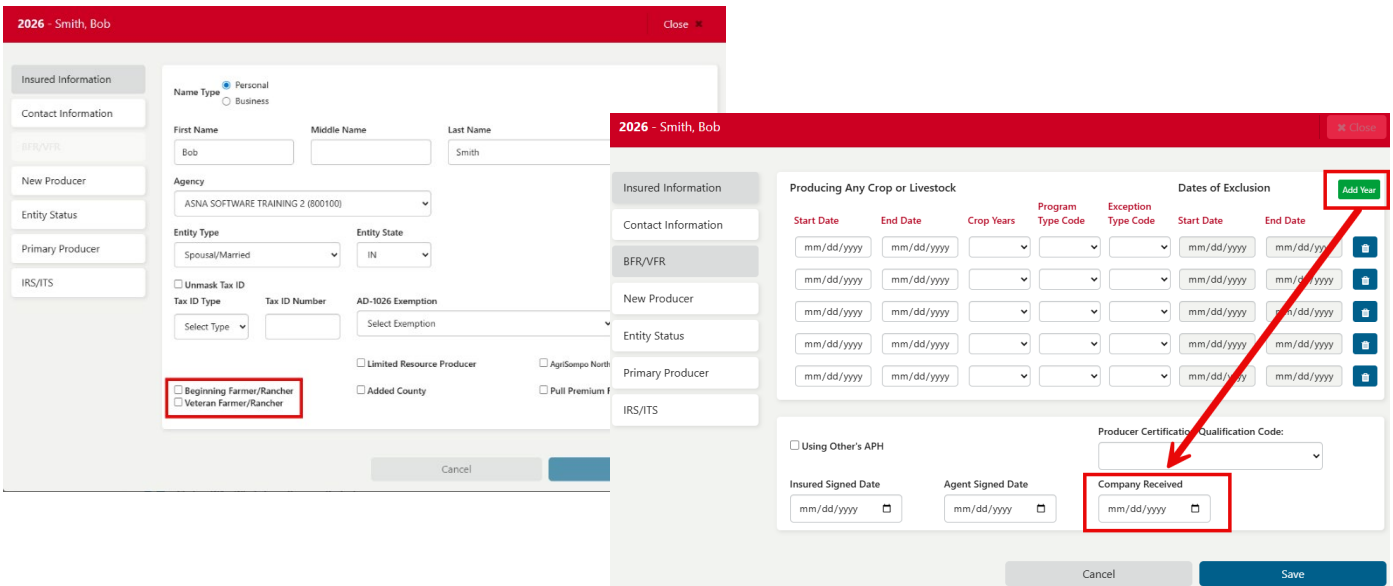

Import

Policy

Agents can now select or deselect Beginning Farmer/Rancher (BFR) and Veteran Farmer/Rancher (VFR) on both new and renewal policies.

Please note, if the insured already has BFR benefits and updates are needed on an existing application, all changes will be routed through Underwriting.

The Add Year option will only be available when the Company Received Date field is blank.

Policy Cont.

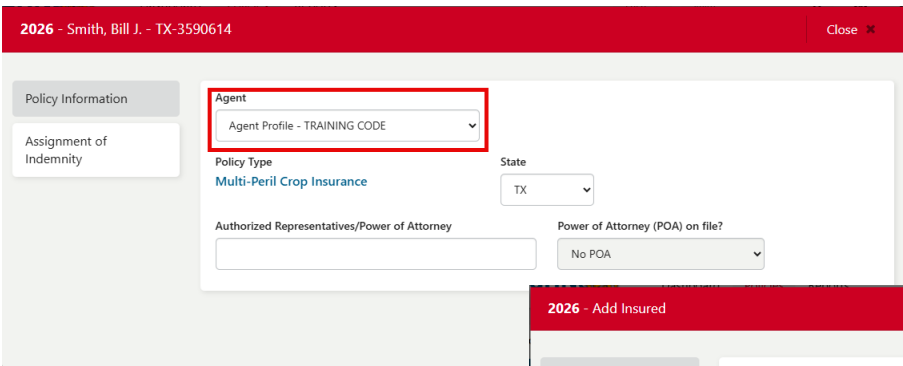

Agents now have the ability to Unmask Tax IDs for both insureds and SBI, previously only allowed by Underwriting. The Tax ID will be defaulted to masked.

The screenshot shows the '2026 - Smith, Bob' form. The 'Unmask Tax ID' checkbox is checked, and the 'Tax ID Number' field is populated with '***0414'. The 'Tax ID Type' is set to 'Select Type'. The 'AD-1026 Exemption' is set to 'Select Exemption'. The 'Entity Type' is 'Spousal/Married' and the 'Entity State' is 'IN'. The 'Agency' is 'ASNA SOFTWARE TRAINING 2 (800100)'. The 'First Name' is 'Bob', 'Middle Name' is blank, 'Last Name' is 'Smith', and 'Suffix' is blank. The 'Save' button is highlighted in blue.

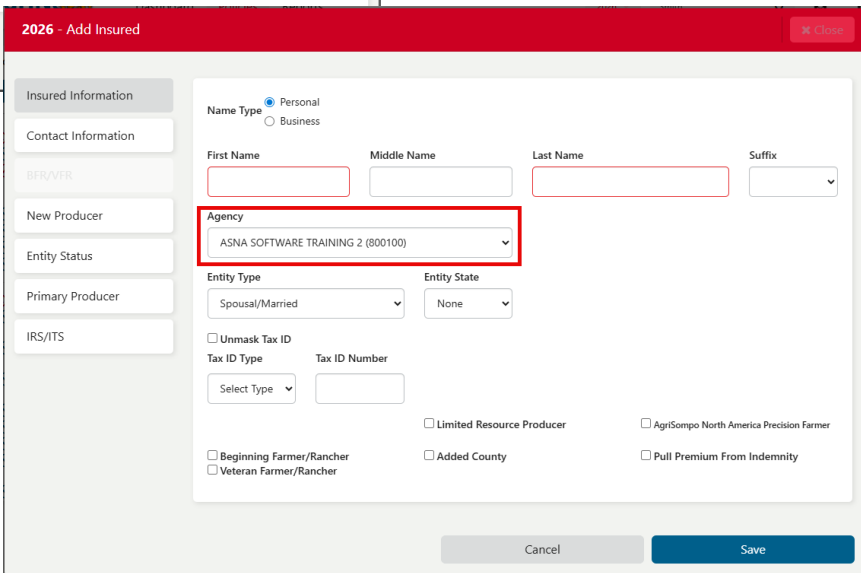

On the Insured, Policy, and Coverage Information tabs, the Agency and Agent name fields will now auto populate when only one option is available. If multiple options exist, the fields will remain blank for manual selection. This update reduces unnecessary clicks and helps streamline the user experience.

Defaulting to Agent

The screenshot shows the '2026 - Smith, Bill J. - TX-3590614' form. The 'Agent' dropdown menu is highlighted with a red box and shows 'Agent Profile - TRAINING CODE'. The 'Policy Type' is 'Multi-Peril Crop Insurance' and the 'State' is 'TX'. The 'Power of Attorney (POA) on file?' is 'No POA'. The 'Save' button is highlighted in blue.

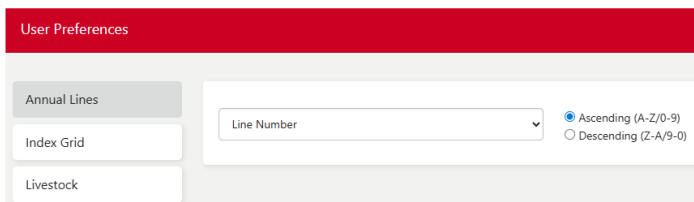

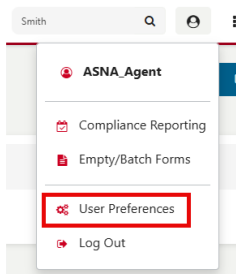

Defaulting to Agency

The screenshot shows the '2026 - Add Insured' form. The 'Agency' dropdown menu is highlighted with a red box and shows 'ASNA SOFTWARE TRAINING 2 (800100)'. The 'Entity Type' is 'Spousal/Married' and the 'Entity State' is 'None'. The 'Tax ID Type' is 'Select Type' and the 'Tax ID Number' is blank. The 'AD-1026 Exemption' is 'Select Exemption'. The 'First Name', 'Middle Name', 'Last Name', and 'Suffix' fields are blank. The 'Save' button is highlighted in blue.

Policy Cont..

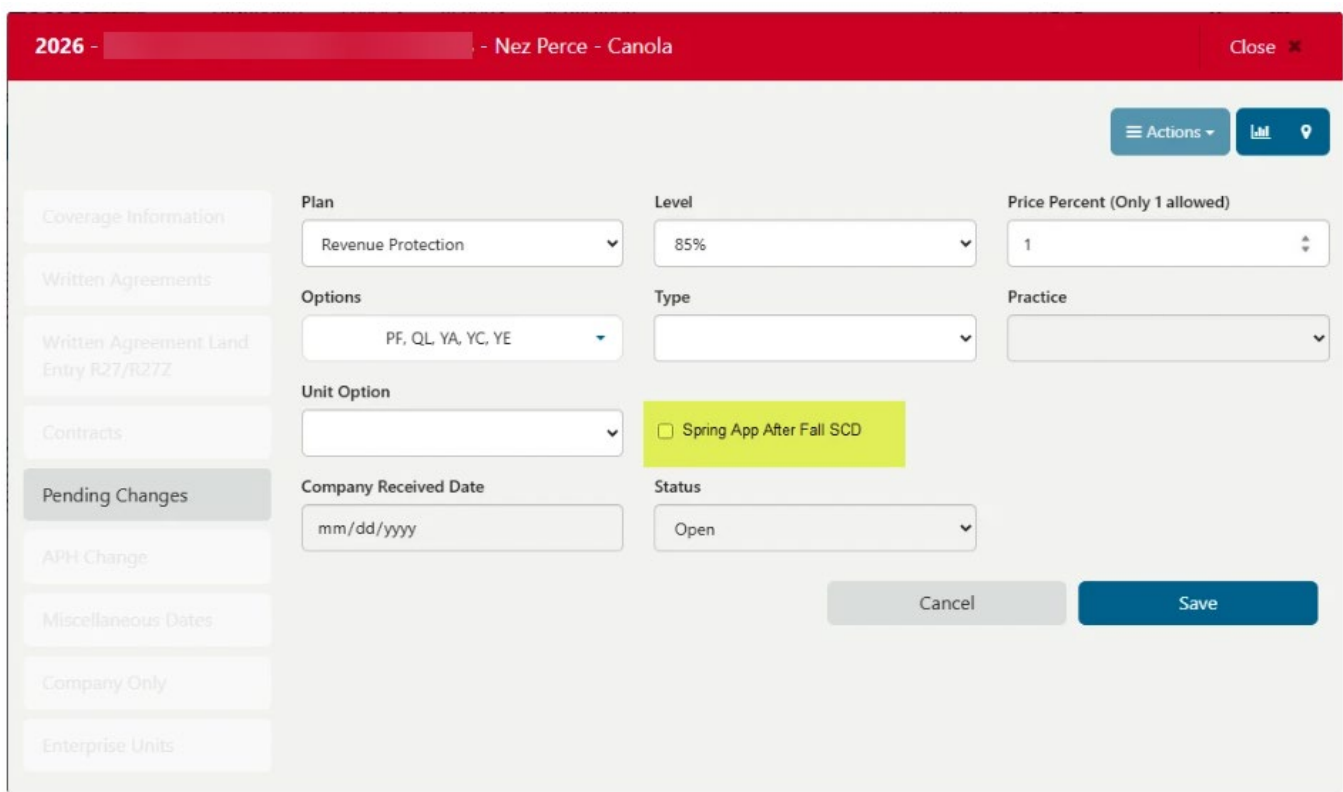

The lines on the **Same Year Production Quick Report** (accessed through in the Actions button) appear in the same order you've selected in your **User Preferences**.

A screenshot of the 'User Preferences' form. It has a red header. On the left, there are three buttons: 'Annual Lines', 'Index Grid', and 'Livestock'. In the center, there is a 'Line Number' dropdown menu. To the right, there are two radio buttons: 'Ascending (A-Z/0-9)' (selected) and 'Descending (Z-A/9-0)'.

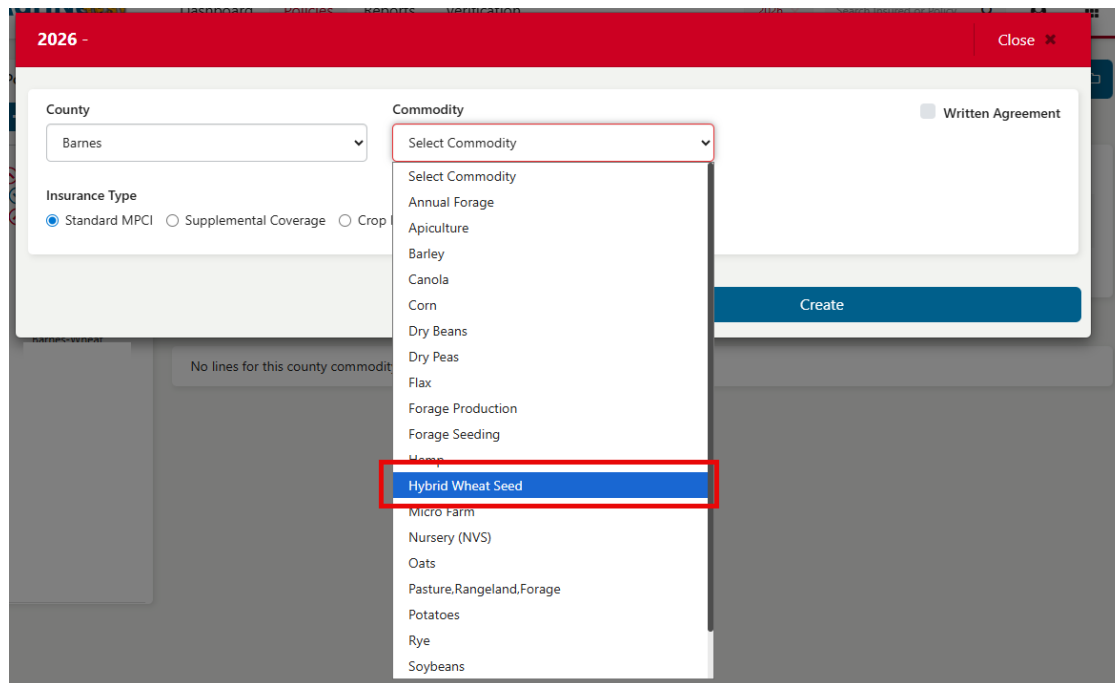

Lines	
17	OU 003-0003 Irrigated No Type Specified
18	EU 003-0004 Non-Irrigated No Type Specified
128	OU 002-0001 Irrigated No Type Specified
129	EU 002-0002 Non-Irrigated No Type Specified
130	OU 002-0003 Irrigated No Type Specified
131	EU 002-0004 Non-Irrigated No Type Specified
132	EU 002-0005 Non-Irrigated No Type Specified

Dual Season commodities

For wheat, barley, and canola policies that have **Dual Season** in the same reinsurance year, insureds may choose a different coverage level, projected price percentage, or plan at the second **SCD** if certain requirements are met. To support this, a new checkbox will appear on the Coverage Information screen and in the **Policy Change** modal. This option will be labeled **"Spring App After Fall SCD."**

A screenshot of the 'Policy Change' modal for the year 2026, policy 'Nez Perce - Canola'. The modal has a red header with the year and policy name, and a 'Close' button. On the left is a sidebar with navigation links: Coverage Information, Written Agreements, Written Agreement Land Entry R27/R27Z, Contracts, Pending Changes (selected), APH Change, Miscellaneous Dates, Company Only, and Enterprise Units. The main area contains several fields: 'Plan' (Revenue Protection), 'Level' (85%), 'Price Percent (Only 1 allowed)' (1), 'Options' (PF, QL, YA, YC, YE), 'Type' (empty), 'Practice' (empty), 'Unit Option' (empty), 'Company Received Date' (mm/dd/yyyy), and 'Status' (Open). A checkbox labeled 'Spring App After Fall SCD' is highlighted in yellow. At the bottom right are 'Cancel' and 'Save' buttons.

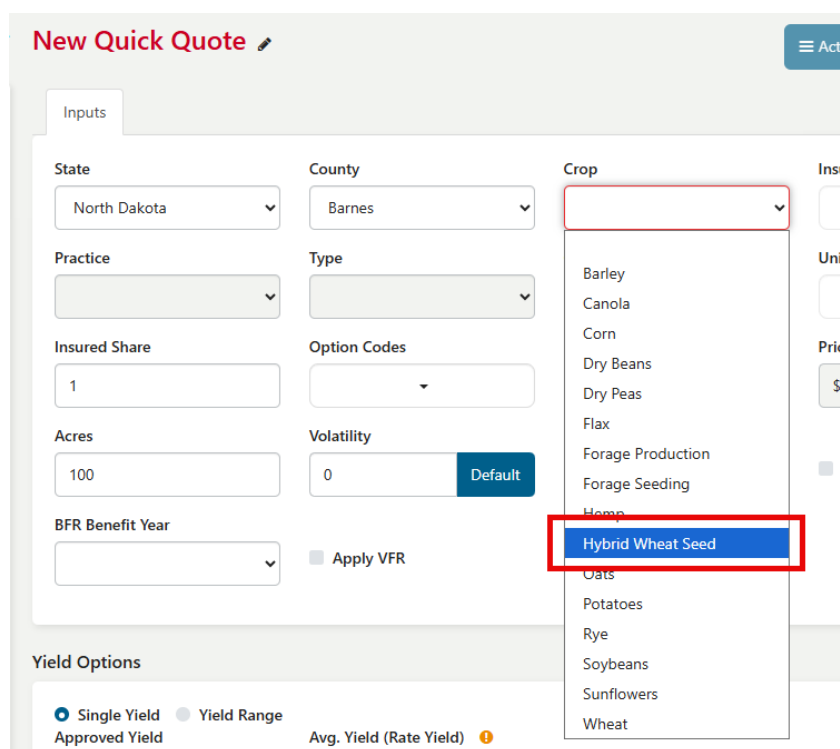

Hybrid Wheat Seed is now in AgriNet and ready for policy entry for the **2026CY!**

The screenshot shows the '2026 -' policy entry form. The 'County' dropdown is set to 'Barnes'. The 'Commodity' dropdown is open, showing a list of crops. 'Hybrid Wheat Seed' is highlighted in blue and enclosed in a red box. Other crops listed include Annual Forage, Apiculture, Barley, Canola, Corn, Dry Beans, Dry Peas, Flax, Forage Production, Forage Seeding, Hemp, Micro Farm, Nursery (NVS), Oats, Pasture, Rangeland, Forage, Potatoes, Rye, and Soybeans. The 'Insurance Type' section has 'Standard MPC' selected. A 'Create' button is visible on the right.

Quoting

Hybrid Wheat Seed has been added to the **Quick Quote** and **Max Estimate** for **2026CY**.

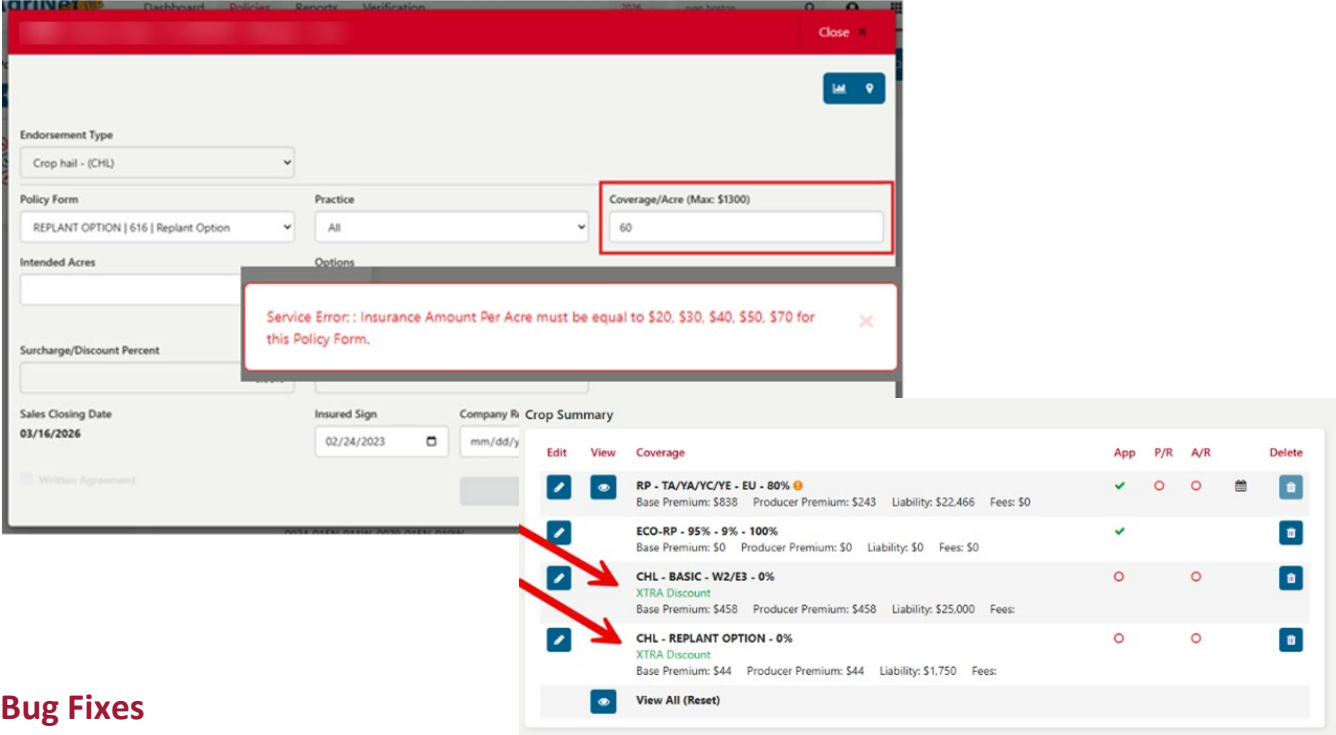

The screenshot shows the 'New Quick Quote' form. The 'State' dropdown is set to 'North Dakota'. The 'County' dropdown is set to 'Barnes'. The 'Crop' dropdown is open, showing a list of crops. 'Hybrid Wheat Seed' is highlighted in blue and enclosed in a red box. Other crops listed include Barley, Canola, Corn, Dry Beans, Dry Peas, Flax, Forage Production, Forage Seeding, Hemp, Oats, Potatoes, Rye, Soybeans, Sunflowers, and Wheat. The 'Insured Share' is set to '1'. The 'Acres' is set to '100'. The 'BFR Benefit Year' is set to '1'. The 'Volatility' is set to '0' with a 'Default' button. The 'Apply VFR' checkbox is checked. The 'Yield Options' section has 'Single Yield' selected. The 'Avg. Yield (Rate Yield)' is displayed.

Private Product - Policy

Replant Levels for 2025 and forward will limit offerings of Replant Option and Replant Endorsement coverage to the correct coverage amount by state/crop.

If an invalid amount is entered, a message will appear stating: “Service Error: Insurance Amount Per Acre must be one of the available values for this Policy Form,” followed by the list of acceptable values for that crop, state, and policy form.

Xtra discounts: If the policy keyed qualifies for the Xtra Discount, a note will be added to AgriNet on the Crop Summary.

The screenshot shows the AgriNet Private Product - Policy form. A red box highlights the 'Coverage/Acre (Max: \$1300)' field, which contains the value '60'. A red error message box states: "Service Error: Insurance Amount Per Acre must be equal to \$20, \$30, \$40, \$50, \$70 for this Policy Form." Below the form, a 'Crop Summary' table is displayed with the following data:

Edit	View	Coverage	App	P/R	A/R	Delete
		RP - TA/YA/YC/YE - EU - 80% Base Premium: \$838 Producer Premium: \$243 Liability: \$22,466 Fees: \$0

		View All (Reset)				

Bug Fixes

- **Pecan Revenue APH** Reporting has been corrected. Users are able to key Pecan Revenue APH in the first module.
- **Cotton Seed Endorsement** now has its own summary line on quotes when seed endorsement is elected. Previously it was included in the base coverage premium.
- **NVS** policies were unable to add TS to the existing HIP-WI coverage on the policy. This has now been corrected.
- When the **Revenue Plan Loss Estimator (RPLE)** is generated, split lines were not combining on one line as the total revenue guarantee for the unit. This has now been corrected.
- When the **Revenue Plan Loss Estimator (RPLE)** is generated, claim production is now showing on the form, once the adjuster has keyed production to count.
- When the **Revenue Plan Loss Estimator (RPLE)** is generated, cottonseed endorsement now has a separate location to reflect the SE guarantee. Previously it was combined with base coverage revenue guarantee.
